

Neometals

Annual General Meeting Presentation

> ASX Code: NMT November 2016

Disclaimer

Summary information: This document has been prepared by Neometals Ltd ("Neometals" or "the Company") to provide summary information about the Company and its associated entities and their activities current as at the date of this document. The information contained in this document is of general background and does not purport to be complete. It should be read in conjunction with Neometals' other periodic and continuous disclosure announcements lodged with the Australian Securities Exchange, which are available at www.asx.com.au.

Forward-looking information: This document includes certain statements, opinions, projections, forecasts and other forward-looking information which, while considered reasonable by Neometals, are inherently subject to significant uncertainties and contingencies. Many known and unknown factors could cause actual events or results to differ materially from estimated or anticipated events or results included in this document. Recipients of this document are cautioned that forward-looking statements are not guarantees of future performance – they must make their own independent investigations, consideration and evaluation of the opportunity to invest in the Company. By accepting this document, recipients agree that if they proceed further with their investigations, consideration or evaluation of the opportunity to invest in the Company, they will make and rely solely upon their own investigations and enquiries and will not in any way rely upon this document.

Any statements, opinions, projections, forecasts and other forward-looking information contained in this document do not constitute any commitments, representations or warranties by Neometals and its associated entities, directors, agents and employees, including any undertaking to update any such information. Except as required by law, and only to the extent so required, directors, agents and employees of Neometals shall in no way be liable to any person or body for any loss, claim, demand, damages, costs or expenses of whatsoever nature arising in any way out of, or in connection with, the information contained in this document.

Financial data: All figures in this document are in Australian dollars (AUD) unless stated otherwise.

Not financial product advice: This document is for information purposes only and is not financial product or investment advice, nor a recommendation to acquire securities in Neometals. It has been prepared without taking into account the objectives, financial situation or needs of individuals. Before making any investment decision, prospective investors should consider the appropriateness of the information having regard to their own objectives, financial situation and needs and seek legal and taxation advice appropriate to their jurisdiction.

Investment risk: An investment in securities in Neometals is subject to investment and other known and unknown risks, some of which are beyond the control of Neometals. The Company does not guarantee any particular rate of return or the performance of Neometals. Investors should have regard to the risk factors outlined in this document.

Competent Persons Statement:

The information in this document that relates to, "Barrambie Mineral Resource Estimates", "Barrambie Pre Feasibility Study Results", "Mt Marion Mineral Resource Estimates" and "ELi Lithium Downstream Feasibility Results" is extracted from ASX Releases set out below. The Company confirms that it is not aware of any new information or data that materially affects the information included in the ASX Releases set out below, and in the case of estimates of mineral resources, that all material assumptions and technical parameters underpinning the estimates in those ASX Releases continue to apply and have not materially changed.

6/12/2013	Barrambie - Amended JORC 2012 Mineral Resource Estimate
25/08/2015	Barrambie Pre Feasibility Study Results
11/7/2016	Positive Lithium Downstream Processing Results
27/10/2016	Mt Marion Mineral Resource Upgrade

The Company confirms that all the material assumptions underpinning the production target and the forecast financial information derived from the production targets in the Barrambie Pre-feasibility Study and ELi Lithium Downstream Feasibility Study continue to apply and have not materially changed.

All the right elements

Current Strategy

Grow market cap from maximising returns from existing operations, increasing margins via higher value (downstream) products and developing growth options.

- Increased Mt Marion production plan 60% to 50kt LCE
- Advanced project to add value to offtake rights with LiOH MOU
- Secured rights to, and advanced the commercialisation of, Neomet Process with Sedgman
- Attracted senior mining executives Mike Tamlin to COO, Ms Streltsova and Mr Ritchie to board
- Cash and investments now ~ A\$78M, no debt

Long-term Strategy

to develop a portfolio of globally significant mineral resources

into lower-risk, long-life, high-margin operations to optimise stakeholder returns

2 cent unfranked div – April '16 2 cent unfranked div – Aug '16 A\$5M/5% on market buyback

Operating structure

Neometals

7

Mt Marion Lithium Operation

13.8% Neometals Ltd
43.1% Ganfeng Lithium
43.1% and Operator
Mineral Resources Ltd (ASX:MIN)

Globally Significant Resource & Production – 400,000t concentrates containing 50kt LCE

Neometals

Li + Ti = Nm

Strong Operating Partner

- ✓ Australia's largest contract minerals processor
- Operate mine-to-port on BOO basis
- ✓ No upfront capital cost to NMT
- Certainty of construction and production timing
- ✓ Minimum production levels (~50ktpa LCE)
- ✓ Fixed rate mining and processing costs

Strong Offtake Partner

赣锋锂业 **EanfengLithium**

- China's leading, most profitable lithium producer
- ✓ Life-of-Mine, *Take-or-pay* Offtake Agreement
- ✓ At Market Price with <u>floor price</u> protection
- ✓ US\$20M Letter of Credit (100% payment on shipping)
- Ability for MIN/Neometals to take equity share of production after 3 years.

Lithium Concentrate Prices

Chinese Spodumene Imports 2014 - 2016: From Australia (6% Li₂O)

Source: SignumBOX, Global Trade Information Services and Neometals Management

Neometals

F

Crushing - Fully Commissioned

Beneficiation – Coarse Circuit complete

- Site works commenced Nov'15
- World's largest hard rock concentrator built from scratch in <12 months despite +40 days lost to rain.

26 August

 \checkmark

 \checkmark

31 July

Beneficiation – Commissioning in progress

Beneficiation – Commissioning in progress

Beneficiation – Stockpiling Finished Product

Li

Project milestones

Neometals

Li

Downstream processing Kalgoorlie Lithium Refinery Project

Strategy – increase margin through downstream processing

Strong demand – constrained supply

Lithium Chemicals in Cathode Materials for Rechargeable Batteries

Neometals

Li

New Commercialisation Plan

- Locate plant in Goldfields to minimise transport, 7t concentrates needed for 1t of Lithium Hydroxide
- Utilise local workforce, reagents and energy infrastructure
- Use Conventional Sulfate/Caustic Flowsheet used by leading Chinese Converters
- Remove technology risk speed to market
- NMT/MIN to contribute offtake, nominally ~ 25:75 split

Downstream processing ELi Process

Neometals 70% Mineral Resources 30%

Adapted Patented Technology for production of LiOH from LiCI

Li +	Ti	=	Nm
------	----	---	----

ELi levels playing field for hard rock converters

Lithium Industry Competitive Cost Position 2016 Cash Costs for Lithium Hydroxide (US\$ per tonne)

Source: Global Lithium LLC (costs), Industrial Minerals (price), Neometals Management (ELi cost)

ELi potentially slashes brine-based LiOH opex vs Li2CO3 causticising

Relative LiOH Conversion Costs from LiCi Brine (US\$ per tonne LiOH.H₂O) - Argentina basis) ELi Process = Base 100

Business model is to licence to existing brine producers in return for royalty stream:

- De-risks ELi for own use later
- Quicker
 cashflow
- Higher P/E
 multiple

Barrambie Titanium Project

100% Neometals

Titanium Fundamentals

Neometals

T

Titanium Fundamentals

TiO₂ Producer Profitability (2015)

High Quality Resource

TA

Licenced low-cost Technology

Relative Standard-Plant Cash Operating Costs (US\$ per tonne TiO₂ delivered basis) Neometals PFS = Base 100

Disclaimer: The TZMI costs (NA, EU, China) are for standard plant models in each location. They are not specific costs, neither are they averages of the costs for a location. Q4 2014 TZMI information and Neometals scoping and pre-feasibility studies performed separately and may not be like-for-like analysis

Neometals

T

Utilising Neomet Process

Neometals

TA

Sources: SQM (Brine Flowsheet) and Neometals internal analysis including 2012 Pre-feasibility Study. All prices are FOB Basis.

Commercialisation Plan

^(*) Subject to Board Approval

Neometals

Ti

Technology Licensing Neomet Process

Neometals - 25% of royalty revenues

Patented Neomet Process

Commodity agnostic – developed in Canada for Ni-laterites, used commercially for treating refractory copper-gold concentrates, adapted for titanium concentrates.

Li + Ti = Nm

Low-cost acid regeneration

Business model is to licence to new/existing metal producers in return for royalty stream.

Advantages

- Recovers full strength HCI +32% vs 18%
- Almost no HCI loss
- Benign tailings

Sedgman Alliance

Note 1: The licence and royalty relationship may be managed through the EPC Contractor pending project and Client requirements

Note 2: The Principal Contractor will interface with the client directly and manage all delivery functions relating to the project (eg engineering, procurement and construction)

Third-party ore test-work underway

Nm

Premises leased by Neometals

Laboratory scale set up (above) Pilot scale up (below)

Project Development Phasing

Investment Proposition

Lithium : Cash and cashflow

Titanium : A growth story for 2017

Technology : developing a diversified portfolio
